TEMPERED GLASS OPTIONS

ALUMINUM FULL VIEW GARAGE DOORS

Tempered Glass for added Safety and Durability

- **Shatter-Resistant Design**
  In the unlikely event of breakage, tempered glass crumbles into small, blunt pieces, reducing the risk of injury compared to sharp, jagged shards of annealed glass.
- **Exceptional Impact Resistance**
  Tempered glass boasts a strength approximately four to five times greater than annealed glass, making it resilient to impacts and pressure for lasting durability.

Variety of Glass Types (all glass is tempered)

Enhance your garage door's look with a range of glass finishes. Choose from:

Clear Glass:
Offers a full view and maximizes natural light, creating a brighter interior space.

Tinted Glass:
Reduces glare and adds a subtle tone for privacy and style.

Acid-Etched Glass:
Perfect for superior privacy with an elegant matte-out.
